Index for Volume 55 (1984)

This index is composed of three subindexes: I. Bibliographical Index, II. Author Index and III. Topic Index.

Entries in the bibliographical index have been indexed by the last name of the author, or in the case of multiple authors by the last name of the first author. Reference information includes the name(s) of the author(s), title of the article, and the volume number and pages on which the article may be found.

The author index cites the name of each author included in the volume, followed by the volume number and pages of the article. In cases where the cited author is not the first author of the article, the first author is cited in parentheses, so that the article may then be located in the bibliographical index if desired.

In the topic index, each article is listed under those important subjects about which the article provides information. The article title with volume and page numbers is also given.

I. Bibliographical Index

Alexander, John F.; Liang, Michael T. C.; Stull, G. Alan; Serfass, Robert C.; Wolfe, D. Roy and Ewing, John L. A Comparison of the Bruce and Liang Equations for Predicting $\dot{V}O_2$ max in Young Adult Males. 4, 383-387.

Baranowski, Tom; Dworkin, Rosalind J.; Cieslik, Chester J.; Hooks, Paul; Clearman, Donna R.; Ray, Laura; Dunn, J. Kay and Nader, Philip R. Reliability and Validity of Self-Report of Aerobic Activity: Family Health Project. 4, 309-317.

Baumgartner, Ted A.; East, Whitfield B.; Frye, Pat A.; Hensley, Larry D.; Knox, Doug F. and Norton, Candace J. Equipment Improvements and Additional Norms for the Modified Pull-Up Test. 1, 64–68.

Baumgartner, Ted A. and Wood Sharon S. Development of Shoulder-Girdle Strength-Endurance in Elementary Children. 2, 169–171.

Brailsford, Dennis 1787: An Eighteenth Century Sporting Year. 3, 217–230.

Brown, Janet G.; Abraham, Lawrence D. and Bertin, John J. Descriptive Analysis of the Rip Entry in Competitive Diving. 2, 93–102.

Bryce, G. Rex and Barker, Ruel M. Variability and Sampling Inspection in the NOCSAE Standards for Football Helmets. 2, 103–108.

Campaigne, Barbara N.; Gilliam, Thomas B.; Spencer, Martha L. and Gold, Ellen R. Heart Rate Holter Monitoring of 6- and 7-Year-Old Children with Insulin Dependent Diabetes Mellitus. Cardiovascular and Short term Metabolic Response to Exercise: A Pilot Study. 1, 69–73.

Chalip, Lawrence; Csikszentmihalyi, Mihaly and Larson, Reed. Variations of Experience in Formal and Informal Sport. 2, 109–116.

Chausow, Sharon A.; Riner, William F. and Boileau, Richard A. Metabolic and Cardiovascular Responses of Children during Prolonged Physical Activity. 1, 1–7.

Chelladurai, P.; Inglis, S. E. and Danylchuk, K. E. Priorities in Intercollegiate Athletics: Development of a Scale. 1, 74–79.

Clarke, David H.; Vaccaro, Paul and Andresen, Nancy M. Physiological Alterations in 7- to 9-Year-Old Boys Following a Season of Competitive Wrestling. 4, 318-322.

Clarkson, Priscilla M.; Kennedy, Theresa E. and Flanagan, Jeanne. A Study of Three Movements in Classical Ballet. 2, 175–179.

Clearly, Monica L.; Moffatt, Robert J. and Knutzen, Kathleen, M. The Effects of Two- and Three-Day-Per-Week Aerobic Dance Programs on Maximal Oxygen Uptake. 2, 172–174.

Corcos, Daniel M. Two Handed Movement Control. 2, 117–122.

Crain, Cindy; Eisenhart, Margaret and McLaughlin, John. The Application of a Multiple Measurement Approach to Investigate the Effects of a Dance Program on Educable Mentally Retarded Adolescents. 3, 231–236.

Croucher, John S. An Analysis of World Weightlifting Records. 3, 285–288.

Epstein, Leonard H.; McGowan, Colleen and Woodall, Karen. A Behavioral Observation System for Free Play Activity in Young Overweight Female Children. 2, 180–183.

Erbaugh, Sarah J. The Relationship of Stability Performance and the Physical Growth Characteristics of Preschool Children. 1, 8–16.

Erbaugh, Sarah J. and Clifton, Marguerite. Sibling Relationships of Preschool-Aged Children in Gross Motor Environments. 4, 323-331.

Ewing, John L. Jr. and Stull, G. Alan. Rate of Force Development in the Hard-Gripping Muscles by Females as a Function of Fatigue Level. 1, 17–23.

Feltz, Deborah L. and Weiss, Maureen R. The Impact of

Girl's Interscholastic Sport Participation on Academic Orientation. 4, 332-339.

III. Topic Index

Academic Learning Time in Physical Education. ____ in Elementary School for Student Subgroups and Instructional Activity Units. 4, 365-370.

Academic orientation. The Impact of Girl's Interscholastic Sport Participation on ____. 4, 332-339.

Adipose cellularity, adiposity. Effects of Sit Up Exercise Training on Adipose Cell Size and Adiposity. 3, 242–247.

Adolescent track and field athletes. Isokinetic Leg Flexion and Extension Strength of Elite Female ____. 4, 347–350.

Aerobic activity. Reliability and Validity of Self Report of ____: Family Health Project. 4, 309-317.

Aerobic capacity. Physiological Alterations in 7- to 9-Year-Old Boys Following a Season of Competitive Wrestling. 4, 318-322.

Aging. Body Composition and Physiological Responses of Masters Female Swimmers 20 to 70 Years of Age. 3, 278–284.

Aging. Effect of Mastering Swim Skills on Older Adults' Self-Efficacy. 3, 294–296.

Anaerobic, power and capacity. Body Composition and Physiological Characteristics of Female High School Gymnasts. 1, 80–84.

Anthropometry. Body Composition and Physiological Characteristics of Female High School Gymnasts. 1, 80–84.

Assimilation. ____ Effects in Coincident Timing Responses. 1, 89–92.

Athletics. The Impact of Girl's Interscholastic Sport Participation on Academic Orientation. 4, 332-339.

Ballet. A Study of Three Movements in Classical ____. 2, 175–179.

Baseball, youth. Interpretting ____: Players' Understanding of Fun and Excitement, Danger and Boredom. 4, 379-382.

Batting. Bat Dynamics of Female Fast Pitch Softball Batters. 2, 141–145.

Behavioral observation. A ____ System for Free Play Activity in Young Overweight Female Children. 2, 180–183.

Blood lactate. The Net Physiological Cost of Dribbling a Soccer Ball. 3, 267–271.

Blood pressure. Metabolic and Cardiovascular Responses of Children During Prolonged Physcial Activity. 1, 1–7.

Biomechanics. Accuracy of a Perspective Control Lens. 2, 197–200.

Body composition. Validity of "Generalized" Equations for ____ Analysis in Women Athletes. 2, 153–160.

Body composition, density. Body Composition and Physiological Responses of Masters Female Swimmers 20 to 70 Years of Age. 3, 278–284.

Breast volume. A Water Displacement Method for the Determination of ____. 4, 388-389.

Bruce equation. A Comparision of the ____ and Liang Equations for Predicting $\dot{V}O_2$ max in Young Adult Males. 4, 383-387.

Cardiac Output. Metabolic and Cardiovascular Responses of Children During Prolonged Physical Activity. 1, 1–7.

Cardiovascular response. Age and ____ to Submaximal Treadmill Exercise in Males. 1, 85–88.

Cardiovascular response. Heart Rate Holter Monitoring of 6- and 7-Year-Old Children with Insulin Dependent Diabetes Mellitus. ____ and Short Term Metabolic Response to Exercise: A Pilot Study. 1, 69–73.

Cardiovascular responses. Metabolic and ____ of Children During Prolonged Physical Activity. 1, 1–7.

Children's activity. Metabolic and Cardiovascular Responses of Children During Prolonged Physical Activity. 1, 1–7.

Children, preschool. The Relationship of Stability Performance and the Physical Growth Characteristics of Preschool Children. 1, 8–16.

Children pre-school aged. Sibling Relationships of ____ in Gross Motor Environments. 4, 323-331.

Children's baseball. A Field Study of Traditional and Non traditional ____. 4, 351-355.

Cinematography. Bat Dynamics of Female Fast Pitch Softball Batters. 2, 141–145.

Cinematography. Mirrored Three-View ____ in Small Animal Locomotion Studies. 2, 201–205.

Coincident Timing. Assimilation Effects in ____Responses. 1, 89–92.

Conceptions of sports. Interpretting Youth Baseball: Players' Understandings of Fun and Excitement, Danger and Boredom. 4, 379-382.

Conceptual physical education. Long-Term Effects of a ____Program. 2, 161–168.

Dance. Support Base Use in Two ____Idioms. 2, 184–187.

Dance training. Relationship of Technical Skill Rank to Age, Gender and Number of Years in ____. 2, 188–190.

Decision-making. ____ in Elementary School-Age Children: Effects upon Motor Learning and Self-Concept Development. 2, 135–140.

Dehydration. The Effects of Rapid Weight Loss and Attempted Rehydration on Strength and Endurance of the Handgripping Muscles in College Wrestlers. 1, 46–52.

Developmental memory differences. Rehearsal Strategy Effects on ____ for Recall of a Movement Series. 2, 123–128.

Diabetes, insulin dependent. Heart Rate Holter Monitoring of 6- and 7-Year-Old Children with ____Mellitus. Cardiovascular and Short Term Metabolic Response to Exercise: A Pilot Study. 1, 69–73.

Diving. Descriptive Analysis of the Rip Entry in Competitive ____. 2, 93–102.

Equilibrium. The Relationship of Stability Performance and the Physical Growth Characteristics of Preschool Children. 1, 8–16.

Ethnographic sport research. Interpretting Youth Baseball: Players' Understandings of Fun and Excitement, Danger and Boredom. 4, 379-382.

Exercise tolerance. Effects of Talking on ——. 3, 237–241.
Exertion, perceived. Attentional Load and the Reproduction of Physical Work. 2, 146–152.
Exertion, perceived. Effects of Talking on Exercise Tolerance. 3, 237–241.
Exertion, perceived. The Net Physiological Cost of Dribbling a Soccer Ball. 3, 267–271.
Expectancy Formation. Multivariate Relationships of Specific Impression Cues with Teacher Expectations and Dyadic Interactions in Elementary Physical Education Classes. 1, 32–40.
Experimental teaching units. The Relationship Between Teachers' Preactive Planning and Student Process Measures. 4, 356-364.
Extracurricular participation. The Impact of Girls Interscholastic Sport Participation on Academic Orientation. 4, 332-339.

Fatigue. The Effects of Rapid Weight Loss and Attempted Rehydration on Strength and Endurance of the Handgripping Muscles in College Wrestlers. 1, 46–52.
Fatigue. Rate of Force Development in the Handgripping Muscles by Females as a Function of Fatigue Level. 1, 17–23.
Fitness levels. A Comparison of the Bruce and Liang Equations for Predicting $\dot{V}O_2$ max in Young Adult Males. 4, 383-387.
Football helmets. Variability and Sampling Inspection in the NOCSAE Standards for ——. 2, 103–108.
Force-time. Rate at Force Development in the Handgripping Muscles by Females as a Function of Fatigue Level. 1, 17–23.
Forearm, physical properties of. Validation of Weinbach's and Hanavan's Models for Computation of ——. 3, 272–277.

Goal structures. The Effects of Cooperative, Competitive and Individualistic Student Interaction Patterns on the Achievement and Attitudes of Students Learning the Golf Skill of Putting. 2, 129–134.
Golf. The Effects of Cooperative, Competitive and Individualistic Student Interaction Patterns on the Achievement and Attitudes of Students Learning the —— Skill of Putting. 2, 129–134.
Grip firmness, tennis racket. Theoretical Modeling of —— During Ball-Racket Impact. 3, 254–260.
Gross motor environments. Sibling Relationships of Preschool-Aged Children in ——. 4, 323-331.
Gymnasts, female high-school. Body Composition and Physiological Characteristics of ——. 1, 80–84.

Hanavan's model. Validation of Weinbach's and —— for Computation of Physical Properties of the Forearm. 3, 272–277.
History of Sport. 1787: An Eighteenth Century Sporting Year. 3, 217–230.
Holter Monitoring. Heart Rate —— of 6- and 7-Year-Old Children with Insulin Dependent Diabetes Mellitus. Cardiovascular and Short Term Metabolic Response to Exercise: A Pilot Study. 1, 69–73.

Imagery, ability and instructions. The Role of Imaginal Processing in the Retention of Visually-Presented Sequential Motoric Stimuli. 1, 24–31.
Impression cues. Multivariate Relationships of Specific —— with Teacher Expectations and Dyadic Interactions in Elementary Physical Education Classes. 1, 32–40.
Interaction analysis. Decision-Making in Elementary School-Age Children: Effects Upon Motor Learning and Self-Concept Development. 2, 135–140.
Interaction patterns. The Effects of Cooperative, Competitive and Individualistic Student Interaction Patterns on the Achievement and Attitudes of Students Learning the Golf Skill of Putting. 2, 129–134.
Intercollegiate athletics. Priorities in ——: Development of a Scale. 1, 74–79.
Interpretive sport research. Interpretting Youth Baseball: Players' Understandings of Fun and Excitement, Danger and Boredom. 4, 379-382.
Isokinetic strength. Isokinetic Leg Flexion and Extension Strength of Elite Adolescent Female Track and Field Athletes. 4, 347-350.
Isometrics. Serum Creatine Kinase Levels Following —— Exercise. 2, 191–194.
Jogging. Joggers versus Nonexercisers: An Analysis of Knowledge, Attitudes and Beliefs about ——. 4, 371-378.
Kinematics. Bat Dynamics of Female Fast Pitch Softball Batters. 2, 141–145.
Kinetics. Ground Reaction Force Symmetry During Walking and Running. 3, 289–293.

Leg flexion and extension strength. Isokinetic —— of Elite Adolescent Female Track and Field Athletes.
Liang equation. A Comparison of the Bruce and —— for Predicting $\dot{V}O_2$ max in Young Adult Males. 4, 383-387.
Linear regression. An Analysis of World Weightlifting Records. 3, 285–288

Memory, motor and short term. The Role of Imaginal Processing in the Retention of Visually-Presented Sequental Motor Stimuli. 1, 24–31.
Metabolic response. Heart Rate Holter Monitoring of 6- and 7-Year-Old Children with Insulin Dependent Diabetes Mellitus. Cardiovascular and Short Term —— to Exercise: A Pilot Study. 1, 69–73.
Metabolic responses. Metabolic and Cardiovascular Responses of Children During Prolonged Physical Activity. 1, 1–7.
Modeling. Sibling Relationships of Preschool-Aged Children in Gross Motor Environments. 4, 323-331.
Motor control. Two-Handed Movement Control. 2, 117–122.
Motoric Stimuli. The Role of Imaginal Processing in the Retention of Visually-Presented Sequential ——. 1, 24–31.
Muscular contraction. Rate of Force Development in the Handgripping Muscles by Females as a Function of Fatigue Level. 1, 17–23.

NOCSAE. Variability and Sampling Inspection in the —— Standards for Football Helmets. 2, 103–108.

Obesity. A Behavioral Observation System for Free Play Activity in Young Overweight Female Children. 2, 180–183.

Oxygen consumption. Metabolic and Cardiovascular Responses of Children During Prolonged Physical Activity. 1, 1–7.

Perspective control lens. Accuracy of ——. 2, 197–200.

Physical education, elementary. Multivariate Relationships of Specific Impression Cues with Teacher Expectations and Dyadic Interactions in —— Classes. 1, 32–40.

Physical growth. The Relationship of Stability Performance and the Physical Growth Characteristics of Preschool Children. 1, 8–16.

Pitching children's baseball. A Field Study of Traditional and Nontraditional Children's Baseball. 4, 351-355.

Preactive planning patterns. The Relationship Between Teachers' ——and Student Process Measures. 4, 000–(356-364.

Predicted outcomes. Sex Differences in Achievement Cognitions and Performance in Competition. 4, 340-346.

Psychometer test batteries. A Model for Estimating the Reliability of ——. 1, 53–63.

Pull Up test. Equipment Improvements and Additional Norms for the Modified ——. 1, 64–68.

Pulmonary ventilation. Physiological Characteristics of World Class White-Water Slalom Paddlers. 2, 206–210.

Rehydration. The Effects of Rapid Weight Loss and Attempted Rehydration on Strength and Endurance of the Handgripping Muscles in College Wrestlers. 1, 46–52.

Research methodology. The Application of a Multiple Measurement Approach To Investigate the Effects of a Dance Program on Educable Mentally Retarded Adolescents. 3, 231–236.

Response Timer. Construction of an Inexpensive ——. 2, 195–196.

Retarded, educable mentally. The Application of a Multiple Measurement Approach to Investigate the Effects of a Dance Program on ——Adolescents. 3, 231–236.

Running, walking. Ground Reaction Force Symmetry During Walking and Running. 3, 289–293.

Schema theory. Motor Schema: The Structure of the Variability Session. 1, 41–45.

Self-concept development. Decision-Making in Elementary School-Age Children: Effects Upon Motor Learning and ——. 2, 135–140.

Self-efficacy. Effect of Mastering Swim Skills on Older Adults' ——. 3, 294–296.

Self-reports. Reliability and Validity of —— of Aerobic Activity: Family Health Project. 4, 309-317.

Serum creatine kinase. —— Levels Following Isometric Exercise. 2, 191–194.

Sex differences. —— in Achievement Cognitions and Performance in Competition. 4, 340-346.

Sex differences. Sibling Relationships of Preschool-Aged Children in Gross Motor Environments. 4, 323-331.

Shoulder-girdle strength. Development of —— Endurance in Elementary Children. 2, 169–171.

Shoulder strength. Equipment Improvements and Additional Norms for the Modified Pull Up Test. 1, 64–68.

Sibling relationships. —— of Preschool-Aged Children in Gross Motor Environments. 4, 323-331.

Sit Up exercise. Effects of —— Training on Adipose Cell Size and Adiposity. 3, 242–247.

Sport. 1787: An Eighteenth Century Sporting Year. 3, 217–230.

Sport, formal and informal. Variations of Experience in ——. 2, 109–116.

Soccer. The Net Physiological Cost of Dribbling a —— Ball. 3, 267–271.

Social aspects of sport. 1787: An Eighteenth Century Sporting Year. 3, 217–230.

Southern California Perceptual Motor Tests. An Analysis of ——. 3, 248–253.

Strength training. Physiological Alterations in 7- to 9-Year-Old Boys Following a Season of Competitive Wrestling. 4, 318-322.

Submaximal exercise. Age and Cardiovascular Response to ——Treadmill —— in Males. 1, 85–88.

Swimmers, female. Body Composition Variables as Discriminators of Sports Participation of Elite Adolescent Female Athletes. 3, 302–304.

Swimmers, physiological responses of. Body Composition and Physiological Responses of Masters Female Swimmers 20 to 70 Years of Age. 3, 278–284.

Symmetry. Ground Reaction Force —— During Walking and Running. 3, 289–293.

Teacher Observation. Academic Learning Time in Elementary School Physical Education (ALT-PE) for Student Subgroups and Instructional Activity Units. 4, 365-370.

Teacher-student interactions. Multivariate Relationships of Specific Impression Cues with Teacher Expectations and Dyadic Interactions in Elementary Physical Education Classes. 1, 32–40.

Tennis ball-racket impact. Theoretical Modeling of Grip Firmness During ——. 3, 254–260.

Tennis ball spin. Spin Imparted to a Tennis Ball During Impact with Conventionally and Diagonally Strung Rackets. 3, 261–266.

Track athletes, female. Body Composition Variables as Discriminators of Sports Participation of Elite Adolescent Female Athletes. 3, 302–304.

Variability of practice. Motor Schema: The Structure of the Variability Session. 1, 41–45.

$\dot{V}O_2$ max. A Comparison of the Bruce and Liang Equations for Predicting —— in Young Adult Males. 4, 383-387.

Water displacement. A —— Method for the Determination of Breast Volume. 4, 388-389.

Weightlifting. An Analysis of World —— Records. 3, 285–288.

Weinbach's model. Validation of ——and Hanavan's Models for Computation of Physical Properties of the Forearm. 3, 272–277.

Wheelchairs. A Treadmill Modification for ——. 3, 297–301.

STATISTICS
with
CRiSP
CRunch Interactive Statistical Package

CRISP offers Statistical Capabilities that compare favorably to mainframe software and Comprehensive Utilities for data management in an interactive menu environment. The result: well-balanced, efficient data analysis.

STATISTICS

ANOVA
- General factorial design with repeated measures
- *Planned and post-hoc contrasts*
- Unequal cell sizes

MULTIPLE REGRESSION
- Forward & backward stepwise
- Analysis of residuals

DESCRIPTIVE STATISTICS
- A complete set
- Histograms
- Scatterplots

CROSSTABULATION
- *Interactive collapsing of* rows and columns
- Extensive contingency table *statistics, including Fisher's* exact test

NONPARAMETRIC RANK TESTS
- *Kruskal-Wallis*
- Mann-Whitney
- Wilcoxon signed-ranks

PRINCIPAL COMPONENTS
FACTOR ANALYSIS
- *75 variables*
- Orthogonal rotations
- Component scores

UTILITIES

FILE MANIPULATION
- Read/write ASCII, DIF, dBase II
- Sort, merge, concatenate, list copy, subset

DATA TRANSFORMATION
- *General purpose edit*
- 36 intrinsic functions
- General transformation language

CUSTOMIZED ENVIRONMENT
- Graphics characters
- Foreground & background colors
- Function keys

INCLUDE YOUR OWN *PROGRAMS*
- File structure provided
- Source code for CRISP features
- *Include your programs* in the CRISP menu

REQUIREMENTS:

IBM-PC/Compatible 192K
DOS 2.0
2 Disk Drives

COST:

CRISP $495
Evaluation Copy $50

dBASE II is a registered trademark of Ashton-Tate.
IBM-PC is a registered trademark of International Business Machines.

White-water paddling. Physiological Characteristics of World Class White-Water Slalom Paddlers. 2, 206–210.

Women athletes. Validity of "Generalized" Equations for Body Composition Analysis in Women Athletes. 2, 153–160.

Work, reproduction, perturbation and perception. Attentional Load and the Reproduction of Physical Work. 2, 146–152.

Wrestlers, children. Physiological Alterations in 7- to 9-Year-Old Boys Following a Season of Competitive Wrestling. 4, 318-322.

Wrestling. The Effects of Rapid Weight Loss and Attempted Rehydration on Strength and Endurance of the Handgripping Muscles in College Wrestlers. 1, 46–52.
